

VALVE LOCKOUT

BALL VALVE LOCKOUT

- These easy to use lockouts, clamp over the valve lever - preventing the valve from being operated. BV - 01 can lock the small sized valves in both open or closed positions, whilst the larger BV - 01 EX / BV - 02 L can only be used in the closed position.
- These two piece, moulded lockouts can be installed on most of the ball valves available internationally.
- They are virtually indestructible. Inner slider is used for gripping the valve handle sleeves inside the cover.
- Once locked, they prevent valve handle from being turned.
- The strong polyurethane plastic make them resistant to cracking and abrasion.
- They are resistant to extreme weather & temperature conditions.
- Non conductive. Available in 4 colours.
